# Keor SP 600 VA Keor SP 800 VA

#### 1. GENERAL FEATURES

The Legrand UPS Keor SP 600/800 VA models are uninterruptible power sources with interactive line technology. They deliver an active power of 360 and 480 W, they are CPU-controlled and are equipped, internally, with valve-regulated, hermetically sealed lead accumulator batteries to guarantee a minimum backup time of 5 minutes at 80% of the load.

The presence of an electronic stabilizer (AVR) inside the UPS provides the connected loads with effective protection against any interference in the electrical mains.

This UPS is available with different types of output sockets with backup protection and surge protection:

- · Versions 3 101 80/3 101 83: four IEC output sockets with
- Versions 3 101 81/3 101 84: one standard German plus one IEC sockets
- Versions 3 101 82/3 101 85: one standard French plus one IEC sockets

 Versions 3 101 79/3 101 95: four IEC output sockets with British Standard Input Power Plug

The UPS is equipped with an USB charging port for mobile devices (only 800VA)

The UPS can be connected to a PC through the USB port allowing you to monitor its operations, thanks to the free software, and carry out an emergency shutdown of Windows and Linux operating systems.

Keor SP is managed by a microprocessor and is able to display the following alarms and operating modes through the smart LED bar:

- normal operation
- battery-powered operation
- overload
- generic fault
- backup time
- end of backup time

The Keor SP is CE marked and compliant with EU directives 2014/30 and 2014/35.

It's also designed and built in compliance with the following standards:

• EN 62040-1 "Safety requirements for UPSs"

• EN 62040-2 "Electromagnetic Compatibility requirements (EMC) for UPSs"
